

General CRG Chassis Set-up Information

The information below is provided as a quick reference for initial chassis set-up

Starting Points	Front Track Width	117cm
	Rear Track Width	139cm
Seat Placement	Top-back edge of seat to Axle	23cm
	Front edge of seat to front frame	58cm
	Relation of seat bottom to front frame	Below 2cm

The above are the standard measurements to obtain maximum
Seat mounting bolts should always be tight
Four seat struts are recommended in addition to the standard mounts

Weight Percentages	Front	35%
	Rear	65%

Shift weight to front to add front grip

Axle Rear Grip Effect	Soft Axle	Less Grip
	Medium Axle	Medium Grip
	Hard Axle	High Grip

Refer to CRG Axle chart for selection of correct axle

Toe setting should always be at Zero (0)

Chassis should always be slanted forward (high rear/low front)
